JAMES S MOONEY

GEORGE W MORRISON

School Board of Wakefield.

Report of the Superintendent of Schools

To the School Board and Citizens of Wakefield:

Ten schools have been maintained in the town this year, the school at South Wakefield being reopened soon after the others commenced. There was a delay of a week in opening the school at Wakefield Corner, and after a session of a week there was a vacancy, causing a delay of another week.

Two of the schools are now very small. There are only four pupils in regular attendance at South Wakefield, and only seven at Woodman. Running schools of this kind is an economic and educational waste.

It is very difficult to get satisfactory teachers to remain, and very little good results. We have already had two teachers at Woodman this year, and the present teacher has resigned to take effect at the end of the winter term. The pupils from here can be very easily carried to East Wakefield, which has one of the best equipped and most attractive country schools in the section.

No radical changes have been made during the year. The schools have lacked courses in music and drawing. We are fortunate in having regular musical instruction in the Sanbornville primary school. It might be possible to combine with some other town in employing a music supervisor. Here is a point against running small isolated schools. It would not be practical to have special teachers go several miles to reach four or five pupils. The more schools are concentrated, the more advantages can be given them. A course in drawing has been introduced during the year, which we hope will prove helpful and not too exacting for the regular teachers.

Considerable basket work has been done. We want more and more of the industrial subjects. A few books of help in teaching and managing the schools have been supplied. Four sets of reference books have been purchased. It has been necessary to figure very carefully to keep within the appropriation. The appropriation was considerable smaller than in either of the other towns of the district.

The equalized valuation of the town will be the same as last year: \$1,264,758. In order to receive state aid, it is necessary to raise at least \$4.50 on a thousand for school purposes, or \$5,691.41.

During the past year state aid has been received as follows:

For average attendance.....	\$198 00
For approved teachers.....	162 00
High school rebate.....	46 80

\$406 80

We have a larger number of approved teachers this year. An approved teacher is one who is a graduate of a of a normal school or who holds a state certificate. For each such teacher the town draws \$2 per week from the state. Young people desirous of teaching, will find a wide field open if they will qualify for their work. It is impossible to get approved teachers to go even half way round. There is a lot of room for the ambitious, and the demand is likely to make salaries higher.

There have been several applications for transportation which could not be granted for lack of funds. The town of Wakefield is very liberal in the matter of transportation and the bill is quite a heavy one. Nevertheless all the children should have a chance to attend school, and when schools are closed it is right to provide transportation, when their parents do not have convenient ways to get them to school. Whether parents should be paid

for carrying their own children to school is very questionable and perhaps an unjust burden on the people who have provided everything else for them.

The roll of perfect attendance follows. It is very small, much smaller than it ought to be. The smaller schools especially suffer from poor attendance. The single school of West Ossipee, with a membership of twenty-three, has had more perfect in attendance by a wide margin since the opening of schools in September than the whole town of Wakefield. The school at West Milton had an attendance during the fall term of 100%.

In closing, I wish to thank school board, teachers and citizens for kind cooperation.

Respectfully submitted,

CLARENCE E. MICHELS.

REPORT OF SUPERINTENDENT OF SCHOOLS

TO THE SCHOOL BOARD AND CITIZENS:

I herewith submit my annual report. The same number of schools has been run this year as last, with the exception of South Wakefield, which was closed last spring. Some changes in the teaching force have been necessary, due to resignations and leave of absence.

During the winter the experiment has been tried in the primary school at Sanbornville of having the first grade

attend in the forenoon only, and the second grade in the afternoon. When only one teacher is employed, this gives the same time to a class as in the two-session plan, and should give the same result.

During winter weather, proper ventilation is impossible in a room as crowded as this room was, and some action of this kind was necessary. In the spring the ventilation will not be so serious a problem.

Last spring it was voted by the school board to establish a ninth grade at Union and at Sanbornville. I think this is a very wise plan. Most of us know that the eight grade system is more or less of a failure. The grammar school subjects are of great importance to a boy or girl, whether afterward going to high school or not, and the child who leaves after eight grades goes just too soon to get the full benefit of them.

A class in Sanbornville, which skipped a grade, has been doing nearly ninth grade work this year with excellent results.

The schools need a special teacher of music and drawing, and such might perhaps be had in union with some other town. We have tried to do something in both of these subjects this year, and have had considerable success.

A very important law was passed by the legislature last spring, which has put an end to so much dropping out of school and practically ended the labor certificate business. Children are now required by law to attend school till they are sixteen, unless they have completed the grammar school course.

The matter of transportation has recently been made a subject of investigation by the state department and a bulletin has been issued by them. The question of what is a reasonable distance for children to attend school without transportation at public expense has been investigated, and the opinion seems to be, that with ordinary children it may

be set at about one and one-half miles, but will differ with the age and condition of pupils. Many towns are finding that they have got to curtail this expense some, or their schools will suffer.

No extensive repairs have been made this year. Something needs to be done about the furnace at Union. The walls of the primary room are badly smoked and need re-tinting. Slate has been ordered to replace the blackboard in the Sanbornville intermediate room, where it was in very bad condition. Some new furniture has been purchased.

We have been giving more attention to handwriting than formerly and the result is quite evident in several rooms.

On the whole, I think our labors have been attended with a fair degree of success and relations between parents and schools have been pleasant in almost every case.

In regard to appropriations for the coming year, high school tuition will probably require \$200.00; books and supplies, \$325.00.

The amount which the district is required to raise by law is \$2,355.00. In order to get state aid it must raise \$5,111.00.

We have been fortunate in having a large number of approved teachers this year and the district has drawn \$310.00 from the state toward their salaries.

It will be noted that the high school rebate is on a different basis this year, so that it has been smaller than formerly.

The expenditures this year have been a little larger than last, but as the revenue was also a little larger, about the usual balance is carried on to the next year.

Respectfully submitted,

CLARENCE E MICHELS,

Superintendent.
